

Nordmann Fir

*Unparalleled in beauty and durability,
'Nordys' have excellent needle retention
qualities and a stunning two-tone look.*

This is a
REAL
CHRISTMAS
TREE

It was cultivated for the purpose of your enjoyment. As it was growing this tree cleansed the air, provided oxygen, protected your water supply, made a home for wildlife and beautified the landscape. For each Christmas tree harvested, two or three are replanted to continue this cycle. After the Christmas season recycled trees are often used for compost, landscaping and fish or other wildlife habitat.

Merry Christmas!

For maximum beauty and safety, mount tree in a stand with water and check daily.
